Why Choose TotalRoof?

Our high-solids, low VOC, single-component, 100% silicone roof coating offers unparalleled waterproofing performance. It is extremely flexible, cures rapidly (2-6 hours), and resists oxidation, severe weather, ozone, UV rays, and many chemicals that can damage your roof.

TotalRoof will extend the life of your roof and improve your roof's performance with its superior UV resistance, high tensile strength and extremely low VOC content, all with an extremely environmentally friendly formula.

UV reflective.
Save on energy costs.

100% Silicone Roof Coating	Light Gray	1 or 5 Gallon
100% Silicone Roof Coating	Dark Gray	1 or 5 Gallon

TotalRoof

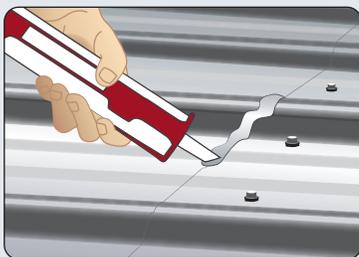

the complete roofing system

100% Silicone Roof Coatings

1. CLEAN: Power wash the roof to remove dirt and debris. Any areas of grease contamination are to be cleaned with an industrial strength detergent. Be sure roof is completely free of debris and dry before moving on.

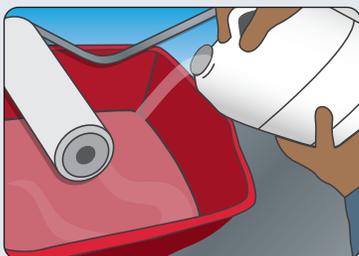

2. PREP: Repair all seams, flashings, drains, and fasteners as laid out in the instructions specific to your roofing surface at totalroofcoatings.com.

3. COAT: Apply PM TotalRoof Silicone Coating with a medium nap roller to the roofing surface. As you are applying the coating, check your coating thickness; rate could change based on application technique, surface texture and wind speeds.

4. CLEAN UP: Clean all tools with mineral spirits. Do not use water. Properly dispose of any unused PM TotalRoof Silicone products in accordance with local, state, and federal regulations.

TotalRoof provides a full line of silicone coatings, accessories, and primers to provide you with a complete roofing system:
