Why Choose TotalRoof?

Our Low Solids, low VOC, single-component, 100% silicone roof coating offers unparalleled waterproofing performance. It is extremely flexible, cures rapidly (2-6 hours), and resists oxidation, severe weather, ozone, UV rays, and many chemicals that can damage your roof.

Total Roof will extend the life of your roof and improve your roof's performance with its superior UV resistance, high tensile strength, and extremely low VOC content. The full line of Total Roof products are crafted with an extremely environmentally friendly formula.

UV reflective.
Save on energy costs.
